LAMPING

SOCKETS: We offer several common socket bases that are intended for use with LED replacement lamps. Please note that fixtures specified with these sockets will have wattage restriction labels showing the wattage level noted in the chart to the left. These wattages are common maximum levels for the associated LED replacement lamp. The exact wattage, lumen output, and CCT is a function of the particular LED lamp chosen by the specifier.

LED MODULES: We offer fixtures with integrated LED modules. The voltage available, wattage, lumen output, and CCT are a function of the particular LED Module specified.

For **RGB** and **TUNABLE WHITE** options, please consult factory.

Hi/Lo Variable Occupancy sensors are available on certain LED Modules. Please consult factory.

Sockets	Description	# of Sockets	Maximum Watts per Socket	Total Watts (maximum)	Volts	Dimmable
LEDE26	Medium Base	1	20	20	120	Yes
LEDGU24	Twist and Lock	1	20	20	120	Yes

Modules	# of Modules	Watts per Module	Total Watts per Fixture	Lumens per Module	Total Lumens per Fixture	CRI	Life/ Hours	Input Voltage	CCT	Dimmable	Warranty
LEDMODSL27	1	4.8	4.8	285	285	84	30,000	120	2700K	0-10V	3 years
LEDMODSL35	1	4.8	4.8	300	300	83	30,000	120	3500K		

For Recommended Dimmers, please consult factory.
