Mounting Options

Option 1

Direct

Slim Panel can be mounted to a wall or existing surface by direct screw mounting. Holes can be drilled in the field (at your own responsibility) at locations on the panel that are 1" - 1-1/2" away from the edges where the LEDs and heat sinks are located.

Note: The factory can pre-drill holes in the panel at request.

Option 2

Mirror Clips

Slim Panel can be mounted by using mirror clips or U channels. Some mounting accessories are available, others can be purchased from any local hardware store. Please consult factory with any specific requests.

Note: Mirror Clips supplied by others.
